1. **BORE THE HOLES**

Use a pocket-hole jig to drill the holes that will join the rails and stretcher to the sides. Secure the pieces with clamps before you drill.

2. **BUILD THE FRAME**

Use the long driver bit provided to drive screws through the pocket holes into the sides. No glue is required for this task.

3. **MARK THE LEGS**

Use a compass to draw the rounded end onto the leg components. Set the pieces aside. The rounded shape will be cut out later.

4. **LOCATE AND DRAW CIRCLE**

Use a compass to mark out the 6-inch circle for the bean bag hole. The hole is centered on the panel, 9 inches down from the end.

5. **CUT THE PARTS**

Use a handheld jigsaw to cut the legs to shape. Next, bore a 1/2" hole into the marked bag hole and use that for the blade access to cut out the hole.

6. **BUILD THE LEG SET**

Attach the legs to the leg support. Drive pocket-hole screws to secure the pieces.
7. ATTACH THE LEG SET

Clamp the leg set into the frame and drill holes through the legs and the frame for 1/4" carriage bolts. Mount the legs.

8. ATTACH THE DECK

Attach the deck to the frame using glue and finish nails. Let the glue cure, then sand the game and paint it as you desire.

MATERIAL LIST (makes one set)

<table>
<thead>
