

FEATURES:

- for 1/4" glass and panel doors
- built-in spring tension holds pull securely to glass-no liner necessary (friction fit)
- has a brushed satin finish
- requires 3/16" gap between two meeting doors for adjacent pulls to clear each other when doors are in closed position
- an excellent pull for inset, overlay, hinged and sliding glass doors

APPLICATIONS:

A pull that friction fits 1/4 thick glass or wood panels. Installs onto edge of panel.

SPECIFICATIONS:

INSTALLATION:

1. Place pull on edge of 1/4" glass door in position wanted. Then with rubber or lead shot mallet, tap lipped edge of pull until lip has completely moved over against edge of glass.
