

SWIVEL MIRROR SCREW

FEATURES:

- bolt of steel
- all exposed surfaces are finished antique
- insert has self tapping thread
- thumb screw and insert are zinc die cast with antique brass plating
- comes with threaded insert (see note on installation section)

APPLICATION:

Use for hanging a mirror frame between uprights that have vertical adjustment.

SPECIFICATIONS:

INSTALLATION:

1. Bore a $\frac{9}{32}$ " hole through the upright.
 2. Mark desired location of hole in mirror frame. normally the hole is 3" to 4" above frame center.
 3. Bore a $\frac{3}{8}$ " hole at marked location.
 4. Thread insert into mirror frame hole. Remove insert, place 5 minute epoxy into hole. Remove inserts, place 5 minute epoxy into hole and then reinstall insert into frame.
 5. Assemble.
- Note: This die was made many years ago and the threading is not compatible with any other inserts.
