

FEATURES:

- white finish
- made from cold rolled steel
- can be flush mounted into a 5/8" wide x 3/16" deep mortise or can be surface mounted
- 24" long
- furnished with serrated mounting nails
- see #22153 for matching shelf support clips

APPLICATION:

This shelf hardware is designed to allow flexibility for multiple arrangements and adjustment of shelves in wood cabinet construction.

SPECIFICATIONS:**INSTALLATION:**

1. With a hack saw cut standard to length to fit within the sidewall. Cut off standards on the high numbered end. Do not cut off end with #1.
2. Locate position of standard 2" to 3" from front and back edges of case sides.
3. Make dado cuts in case side with dado head or router and straight bit for flush mounting. No dado cut is necessary for surface mounts.
4. Assemble and finish cabinet.
5. Attach standards to cabinet side walls (#1 down) with supplied nails. A small pilot hole can be made before driving nails with hammer.
6. Cut shelves to length allowing end clearance between standards.
