

APPLICATION:

Mortised lid support provides an elegant stop for boxes and cases. The body is mortised into the side, and a flanged cylindrical anchor is pressure fit and glued into the lid.

FEATURES:

- Solid brass
- Easily installs with a router and a drill
- Requires 2-7/8" long, 1/4" wide, 1/2" deep mortise in box; and 1/4" diameter, 1/4" deep hole in lid
- Securely holds lid upright at 100 degrees
- Includes brass screws

INSTALLATION:

1. Drill a 1/4" diameter, 1/4" deep hole in the box lid with its center 1" from the center of the hinge pin
2. Cut a mortise into the side of the box 2-7/8" long, 1/4" wide, and 1/2" deep, with its end 1/2" from center of the box hinge pin
3. Dry-fit to verify that the hanger will drop into the hole in the lid support body without binding
4. Glue or epoxy the hanger into the drilled hole, to the depth of its shoulder
