

# ALUMINUM JIG TRACKS

## Universal T-Track

2' - 22104, 3' - 26420, 4' - 20054

Miter Track 3' - 63018

Bench Dog T-Loc Track 3' - 25471

Bench Dog Dual Track 3' - 23880

### APPLICATION:

Universal T-Track boasts a unique stacked-slot design that allows you to attach any accessory with 1/4" T-bolts, 5/16" T-bolts, or 1/4" Hex-bolts. Available in two foot, three foot, or four foot lengths.

Miter Track allows you to incorporate capability for a standard rectangular miter bar or miter gauge in your project. Available in three foot lengths.

T-Loc Track takes all the features of Universal T-Track and adds a tail piece for convenient attachment to the top or side of a fence. Available in three foot lengths.

Dual Track combines the features of Universal T-Track with a side-by-side Miter Track, and adds capability for T-type miter bars as well. Available in three foot lengths.

### FEATURES:

- All tracks are made of aluminum for strength and durability. Universal T-Track and Miter Track are blue; T-Loc and Dual Track are silver.
- Universal T-Track is pre-drilled with holes for #6 flat head screws, centered in the track, and equally spaced on 4" centers along the length of the track. The 2' track has six holes; the 3' track has nine holes, and the 4' track has twelve holes.
- Miter Track is predrilled with four holes for #6 flat head screws. The holes are centered in the track. The middle holes are on 12" centers, and the end holes are 10-1/2" on center from the middle holes.
- T-Loc Track is not pre-drilled for mounting.
- Dual Track is pre-drilled with five holes for #8 flat-head screws. The holes are centered in the miter track portion of the track, with one hole centered in the length of the track and the additional holes on 8-1/2" center to center intervals.
- Mounting screws are not included with any of the tracks.
